LOS ANGELES, CALIFORNIA, SATURDAY MORNING, MARCH 18, 1882.

NO. 90.

WASHINGTON.

Some Democrats do not Tackle Kindly to Rosecrans.

The Chinese Bill Occupies the House—Page is Pressing it Through—Sherman Vindicated.

[Associated Press Dispatches.]

WASHINGTON, March 17th.—There is said to be much bad feeling among certain Democratic members at the selection of Gen. Rosecrans as Chairman of the Campaign Committee. Those who favored Flower say that Rosecrans is too old, and his selection puts the party on the defensive at once with reference to Garfield's friends, and to the anti-Catholic sentiment of the country. Senator Farley has declined service on the Democratic Congressional Campaign Committee, and Senator Grover has been chosen in his place. Senator McPherson also declined.

INTERESTED LISTENERS.
The debate on the Chinese bill today, though not of an exciting nature, was on the whole decidedly an interesting one, as was also the case yesterday. The House manifested more than common interest in the subject under discussion by maintaining an unusually large attendance of attentive listeners.

PAGE IS PRESSING THE BILL.
On account of the large number of members desiring to speak, Page has given notice that he will call the previous question on the Chinese bill tomorrow at 3 o'clock, unless to-morrow be devoted as usual to private bills, and in that event he will call the previous question at 3 o'clock Saturday afternoon.

THE CHINESE BILL IN THE HOUSE.
In the House yesterday Page spoke at some length on the Chinese bill. He showed clearly the necessity for the passage of such a bill, recapitulating various arguments familiar to the people of the Pacific coast. He appealed in strong terms to the Republicans to come to the rescue of the bill. It had been said that polygamy was the twin sister of slavery. He asserted that it was the twin barbarism of Chinese immigration. The merits of the pending bill were then discussed by Robinson, Tyler of Vermont, and Rice of Massachusetts. Willis, of Kentucky, was the first speaker.

In the House to speak yesterday on the Chinese bill. He congratulated the people of California and the people of the whole country that they were at last to receive substantial, if not entire, relief from the evils of Chinese immigration. He followed by entering into a thorough investigation of the question, showing conclusively that the presence of the Chinese was a disturbing and non-assimilating element. The bill was warranted by law and the instinct of self-preservation and by the demand of the lowest patriotism. He was followed by Cassidy, of Nevada, who, after briefly reviewing the question, argued that the bill was not only expedient but right under the Constitution, the

LAWYERS AND THE TREATY.
Taylor, of Ohio, spoke against the bill. It violated the existing treaty between the United States and China. The terms of the bill were unusual and cruel. He opposed the measure because it was unnecessary and dangerous. It was such a measure as was only justifiable on the ground of necessity, as homicide was justifiable in self-defense. He argued that the bill was unnecessary. What did the people of California want of this law? He said they had it in their power to prevent immigration if they hated the Chinese, and contended that if Chinese immigration would degrade labor, why was it they employed these immigrants? He was followed briefly by Briggs, of New Hampshire, and Morse, of Massachusetts. Blount, of Georgia, spoke in advocacy of the bill. He mentioned various features of the measure. He said he favored every paragraph in the bill, and hoped it would pass without any amendment. The bill was then laid over.

IT IS INEXPEDIENT.
At the caucus of Republican Representatives last night a resolution was adopted without dissent to the effect that any legislation at present looking to the reduction of internal revenue taxes on whisky, tobacco and cigars is inexpedient, but that some relief should be accorded by Congress by extending the time in which whisky may remain in bond without the payment of the tax.

THE MAIL SERVICE.
The Committee on Postoffices has authorized Perry to report to the Senate an amendment to the Postoffice Appropriation bill, appropriating \$2,500,000 per annum to enable the Postmaster General to pay for ocean mail service by American ships.

SHERMAN VINDICATED.
The report of the committee investigating the Treasury expenses is very voluminous and completely vindicates Secretary Sherman. The committee recommended certain safeguards against the illegal use of the Treasury Contingent Fund in the future.

How It Works at Orem.
Orem, Utah, March 16.—Nine polygamists out of the eleven members composing the City Council of this city have resigned, and it is said that the vacancies have been filled by the Mayor by the appointment of others who are not polygamists in practice.

PHILADELPHIA PATRIOTISM.

Workingmen's Anti-Chinese Demonstration.

PHILADELPHIA, Pa., March 17.—A labor demonstration, in which probably 3,000 people participated, was held at Horticultural hall to-night by a number of workingmen's organizations of this city. Wm. Mooney, of the Shoemaker's Assembly, and Knights of Labor, presided. A number of transparencies were carried by clubs, which marched to the hall with Labor Rights' inscriptions in great variety on them, most of them being directed against the Chinese. John Swinton, of New York, was the first speaker. He was followed by Philip Van Patton, of Detroit, and P. J. Maguire, Congressman Chas. Drumm was to have been one of the speakers, but he sent word that he was unable to leave Washington owing to the pendency of the Chinese bill. The following resolution was passed:

Resolved, That we heartily endorse the action of the Senate of the United States in passing the Anti-Chinese bill, and that the officers of this meeting be instructed to forward to the Speaker of the House of Representatives as representatives of workingmen of Philadelphia petition for passage of said bill and thus remove menace to welfare of American workmen.

Indicting the Rioters.
OMAHA, Neb., March 16.—The Grand Jury this afternoon returned twenty-five indictments against rioters, charging them with assault to commit murder. The first arrest is that of ex-Councilman Barney Shannon, against whom there are two indictments. He gave two thousand dollars bail. Ed. Walsh, against whom there are four indictments, is in jail, not yet having been able to give the requisite bail of four thousand dollars. He is President of Lorano Labor Union and is the chief ringleader in all demonstrations and has uttered the most incendiary speeches. Other arrests are to immediately follow. No excitement to-day.

ASSAULT TO MURDER.
The Grand Jury presented an indictment for assault to murder against President Walsh and Councilman Shannon of the Labor Union. They were arrested and lodged in jail over night.

In the Snow Drifts.
SAN FRANCISCO, March 17th.—The snow blockade on the Central Pacific continues. Advice from Emigrant Gap say that a snow plow, with eight engines, just cleared the road between Truckee and Blue Canyon. Two sections of the west-bound passenger train, as also the west-bound emigrant with two plows, are stuck between Alta and Blue Canyon. One section of the east-bound passenger is also lying there. It is snowing, wind southwest.

EIGHT FEET OF SNOW.
TRUCKEE, March 17.—The fury of the heavy storm has been broken. It has been snowing at intervals all day, but not enough to make any perceptible increase in the snow on the ground. Between four and five feet of new snow has fallen up to the present time, then with that which was already on the ground when the present storm set in, making between seven and eight feet altogether. By the most strenuous efforts on the part of the railroad manager, the track has been kept open between here and the Blue Canyon since yesterday. Snow plows all kept going all the time in order to clear all the road as it is blocked between Alta and Blue Canyon. There is no traffic on the same. We have had but two mails this week, and our citizens feel as though they were living in the wilderness.

TWELVE FEET AND MORE COMING.
EMIGRANT GAP, March 17.—Of two plows bound east, one is broken down at Gold Run and the other is stuck west of Blue Canyon. The snow is about twelve feet deep. It is snowing now: wind south. There are one hundred and twenty men working between Blue Canyon and Alta, shoveling snow. The chances are slim of any trains getting through to-night. Plows are still there with eight engines, waiting for orders. Wells, Fargo & Co. are transferring letters between Truckee and Alta by carriers on snow shoes. Still snowing; wind southwest.

Tired of Life.
SAN FRANCISCO, March 17.—Adolph Heinrich, a native of Germany aged twenty-nine years, committed suicide at six o'clock this evening at the residence No. 281 Clara street, by shooting himself through the heart. The deceased was a cigar-maker by occupation. For a year past he has been in poor health.

Albion-Richmond Decision.
SAN FRANCISCO, March 17.—A Carson dispatch says in the case of Albion vs. Richmond Mining Companies, on appeal in the Supreme Court, it was today decided that the St. George and Victoria patents were void, and reversed the judgment of the District Court, and remanded the case with instructions to the District Court to enter proper judgment in favor of plaintiffs for all that portion of the lode westerly of the westerly end of the Tiptop claim, and make the injunction against the defendants perpetual. Judgment is to be entered in favor of defendant for that portion of the lode easterly of the westerly end of the Tiptop.

MEXICAN NEWS.

The Railroad—Weather—Behind the Bars—Business.

GUAYMAS, Mexico, March 9, via Tucson, March 17.—The Sonora Railroad is now out sixty miles from Hermosillo. Work on the road is delayed by want of ties. Three vessels are due. The road is graded twenty-four miles ahead. The coldest weather for many years is now being felt here. Ice formed one-half an inch thick. Last night a saloon keeper named Spain attempted to jump the town, leaving his debts behind, but now languishes behind the bars. Stages for Tucson via Altar and Magdalena now leave Carbo. Business of all kinds improving. A large amount of freight is going to the interior.

TUCSON, March 17.—Col. Sam Brannan arrived from Guaymas last night. He reports that Gen. Ortiz, in command of the State troops, is now in pursuit of the Apaches, near the headwaters of the Yaqui river. Affairs in the State are in a very prosperous condition. The influx of Americans is increasing rapidly, both by stages and steamers. Many families are going into the State. Mining properties are being purchased by Americans. The rainfall in the State this season has been larger than known for many years, while the crops throughout the State are promising. There is a large increase in the acreage over any previous year. The Yaqui Indians especially have planted a largely increased quantity of land.

The railroad track is laid to within fifty miles of Magdalena, the graders being within three miles. Manager Robinson expects the road to be constructed to the line by October 1st. It is raining in Tucson. The weather is moderate.

SAN DIEGO DOTTINGS.

[News, March 14th.]
Lower California has had over fifteen inches of rain, including the water made from the melting of two and a half feet of snow.

The Mexico sailed this forenoon for the lower coast, having completed her repairs. She will be in Ensenada by four o'clock, as she makes thirteen knots an hour.

Judge Storm was in Saturday from Lawson valley, and from him we gathered the fact that the valley had some snow and that vegetation was so backward that his cattle were not doing rapidly, and some had died. To help along, a California lion got into the neighborhood and in a few days killed his best colt. The lion had not been killed when the Judge was in.

Mr. Darby, who had the smallpox in our pesthouse, is still in that establishment, but able to take care of himself. He will leave it on Saturday.

Mr. Tom Hogue says he had the worst kind of a case of malignant black smallpox, which he is supposed to have contracted in San Francisco. He says he was vaccinated in New York, some years ago, and thought he was all right. He has had really a hard time of it, and now comes the hard time of the tax-payers, for the bill for his sickness will go over \$500 in money, to pay which the city will be obliged to issue county warrants, and sell them at thirty per cent. discount. Dr. Hoffman attended the case, and did it well, while the good nursing of Mr. Hogue for forty odd days, saved the man. He has \$20 in the hands of Dr. Remondino, we are told.

Tucson is building a \$50,000 Court House.

THE TIMES can also be found at the news-stands of the Palace and Occidental Hotels and Russ House, San Francisco.

DEMOCRATIC UNEASINESS.

The fret and wear and tear of mind in the average Democrat must be terrible, if we are to judge by the tone of the party organs, especially that of a highly esteemed contemporary. To prophesy the ruin of the country for twenty-two long years, and not weary, is a task herculean in itself. And still there was at times something to relieve the work of its hugeness, for there was an unpleasantness that sent to untimely graves hundreds of thousands of men, and the unfriendly hands of foreign governments were more than half lifted against us in league with our own rebels. But the stout hearts of the people joined the stouter hearts of the Republicans, and bore back all enemies, domestic and foreign, and the country was saved. Again, when our finances were demoralized and the interest of the immense debt of the rebellion was bearing insupportably heavy upon our people, and foreign capital gave a cold shoulder to our securities, there came to the front the wisdom of the Republican financiers and reduced our interest in the sum of millions, and placed our bonds among the most favored securities in all the great money centers of the world, and sent business in all our borders on such a boom as was never before known. And yet our esteemed contemporary intimates that the Republican party cannot be trusted with the disbursement of money to build us a navy.

It is well for justice and humanity that the average Americans have been superior to the Democracy, and that they have had the better intelligence to know who were the saviors of the country and the conservators of its credit and promoters of its prosperity. That they have been well proved by the successive elections that gave us Lincoln for two terms, Grant for two terms, and Hayes and Garfield for two terms. Thus the people have endured this kind of prosperous, democratic destruction, for twenty-one years, and with every indication of perpetuating the rule indefinitely. Now this state of things may be testimony to a Democrat that the rulers of the nation in all these years have been wanting in patriotism, but it is evident the people do not believe the version of it that a democratic editor would give. The school, the pulpit and the printing press have wrought a work in the past forty years the Democrat wots not of, or else he persistently ignores. It is a notable fact in proof of the assertion that knowledge is power; that as soon as a people become educated they are inclined to break away from the thralldom of party and trample under foot the shackles that bound them. Knowing for themselves the truth or falsity of the sophistries which democratic leaders and scribblers would cram down the throats of the people, they repudiate them, and vote for the truth and its representatives. Hence is it that the people continue the Republicans in power, content with the past and present, and trustful of the future with a faith that a patriotic devotion to country is still extant in the Republican party.

PRECIOUS METALS.

The yield of precious metals in the States and Territories west of the Missouri, including British Columbia, for the year 1881, was \$84,504,417, and was divided partially as follows:

California	\$18,020,677
Nevada	11,847,564
Oregon	1,189,615
Arizona	8,198,768

WOOL.

The total wool clip of 1881 is put at 43,204,700 pounds. Our exports are valued at \$7,000,000. The value of our home consumption we find no figures for.

An attempt was made to smuggle some women into San Francisco from a China steamer a few days since, brought evidently for immoral purposes, which failed. A law specially designed to cover such cases was enacted in 1875, which makes it compulsory for all Chinese women to present a certificate of good character, and to insure identification the certificate is accompanied with a photograph of the woman and a duplicate is sent to the authorities in this country. There were ten women on the Anjer Head, which reached San Francisco on Wednesday, but five of the photographs failed to correspond with the appearance of the holders and they will be returned whence they came.

LEUTENANT MELVILLE writes to his wife that he undertakes the search for De Long and party solely because ordered so to do by superiors. He is convinced that they have all long since perished.

CALIFORNIA'S BUSINESS.

The following statistics will show what California is doing in the way of commercial products. The figures are from the San Francisco Commercial Herald's review for 1881:

Wheat products of California in 1881, 40,000,000 bushels.

Wheat and flour exports in 1881, 23,361,744 cents.

Sugar imports for 1881, 121,435,900 pounds.

California beet sugar product in 1881, 1,410,553 pounds.

Imports of foreign sugars for the last 12 years, 799,945,810 pounds.

Coffee imports for 1881, 15,343,034 pounds.

Rice imports for 1881, 56,922,968 pounds.

Tea imports for 1881, 17,893,507 pounds.

Gold and silver yield in 1881, \$77,000,000.

Gold product of the Pacific Coast since 1848, \$1,976,470,000.

Silver product of the States and Territories west of the Missouri river since 1858, \$529,735,800.

Increase of immigration in 1881, 28,897 souls.

Banking capital of the State, \$175,000,000.

Wool clip in 1881, 43,204,769 pounds.

Produce of wine for 1881, 9,500,000 gallons.

Merchandise export values by sea in 1881, \$53,664,353.

Barley crop of California in 1881, 2,600,000 cents.

Quicksilver produce in California in 1881, 58,835 flasks.

BLAINE'S ORATION.

The matter of Mr. Blaine's oration on the dead President, as well as the manner of its delivery, has met with the warmest encomiums of the entire country. We are fain to copy one criticism from Harper's Weekly, evidently written by an eye-witness:

"Throughout the hour and a half of the delivery he stood quietly resting his hands upon the sides of the little desk, raising them only once or twice, and in clear measured cadences he read the discourse. His manner, like the address, was free from any excess or highly wrought feeling. Mr. Blaine spoke deliberately throughout. At times he must have been deeply moved, but his voice was never broken, and was grave and firm to the end. The passage in which the final and fatal controversy of Garfield's life was treated was spoken with a dignity that was pathetic from its noble and tender reserve. It was heard with absorbed attention. There was no sound but the measured voice of the speaker, and every face was turned to him. As he said, soberly but with deep feeling, 'more than this need not be said; less than this could not be said. Justice to the dead—the highest obligation that devolves upon the living—demands the declaration that in all the bearings of the subject, actual or possible, the President was content in his mind, justified in his conscience, immovable in his conclusions'—the highest point of interest and feeling and truth in the discourse was reached, and as the orator turned to another topic, the great audience drew a long breath, and felt that what must be said had been said most fitly."

THE protest of the TIMES against allowing the big unwieldy signs which abound all over this city from remaining over the sidewalks was emphasized very forcibly in San Francisco on Wednesday, when a sign suspended across the sidewalk fell, crushing two persons to the ground and killing one of them, a Mrs. Anderson, almost instantly. There is danger in walking the streets in many localities during a wind storm, and it would be a step in the right direction if the city authorities would take cognizance of the matter.

THE New York Herald says the people of California will know more about the Chinese in five years than they do now, and it wants the period of restriction reduced from twenty years to 'contemplated', to five years. Just the trouble is that the people of California know too much of the Chinese now and there is no occasion to wait longer. The bill would be good for naught if but for five years.

JUDGING from the fact that Mr. Yarnell, of the LOS ANGELES DAILY TIMES, obtained about forty subscribers within two days time, this week, and the further fact that the Weekly Standard subscription list is so rapidly being augmented, Republicans and those desiring to become such are accumulating very rapidly in and around Santa Ana. Most of our new-comers are from the States of Iowa, Illinois, Ohio, Kansas, Nebraska, etc., and nine out of ten of them are Republicans. Los Angeles county, which has always been under Democratic rule, will soon be found in the Republican van of progress.—Santa Ana Standard.

THE TIMES is not given to blow or gush, and we are going right along augmenting our subscription list by the dozen every day without making any ado about it, but we only mention it since the Standard has made the fact public. Forty subscribers in two days, and it raining nearly all the time at that, demonstrates the popularity the TIMES has achieved in its short existence, and shows also that Santa Ana has a most intelligent and discriminating class of citizens.

No one here seems to sport a rain gauge, but it is the opinion of a number of good guessers, with whom we have conversed, that since Sunday last not less than three inches of rain have fallen in and around Santa Ana. It is generally conceded that we have had quite sufficient to insure good crops this year. The ground is thoroughly saturated, in fact muddily.—Santa Ana Standard.

MAKE HAY WHILE THE SUN SHINES.

Beyond any reasonable peradventure hay will be a profitable crop during the whole of the coming year, notwithstanding the solid assurances of a good season. Our reasons for this belief are in the facts that there is little of any old hay on hand, and our market eastward not diminish, and our local consumption will largely increase through the increase of population and stock for the uses thereof. With a good grass crop much native grass hay can be secured for the mere raking of it up, and all of this should be secured. It is probably not too late to seed for a hay crop. Those who have suitable ground cannot do better than plow and seed during the balance of this month, as beyond a peradventure, the April showers will make a crop. It is probably correct to say that hay will be quite as profitable as barley at the average summer price. We have felt in duty bound to call the attention of our friends to this matter, hoping they may profit by the suggestion.

In another column this morning will be found a highly interesting, and, we must say, an unusually truthful letter on Los Angeles, as seen by Mr. Edward L. Pierce, now a resident of this county, and a teacher of the school near the Sierra Madre Villa. Of the towns mentioned as being larger than Los Angeles, it is positively asserted by those who ought to know, that this city now leads San Jose in both numbers and business, and while Sacramento outnumbered us, the amount of business transacted here is greater than in that city, and we are hard after her in point of numbers. Oakland is the overflow of San Francisco and properly a part of that city, and thus disposed of Los Angeles is the second commercial city of the State.

COURT NOTES.

The case of the Southern Pacific Railroad Company against White and others was before Judge Howard yesterday, and the motion to set aside the judgment was continued till Monday at 10 A. M.

The case of Wilson against Grijalva was treated similarly. In the case of Myers against Jones, a motion to vacate an order releasing a garnishment heretofore made, was submitted and vacated as to the half of wages. In the estate of Mary F. Miller, deceased, the application of W. W. Ross for special letters of administration to collect \$1300 on deposit in the bank for the purpose of defraying funeral expenses, and was granted under a bond of \$200.

In the estate of E. Nand, deceased, a motion to vacate the order granting commission to take deposition of Maria de la Cruz Ybarra and of Charles Henry, argued, submitted and taken under advisement. It was stipulated by the counsel that notice of taking depositions may stand for that time.

The motion for new trial in the suit of J. G. Downey against Meiner and others, was dismissed, and a motion for the entry of a judgment denied. In the Dubouche divorce case a motion for judgment upon complaint for alimony was passed until to-day at 10 A. M. In the suit of the Mount City Land and Water Company against Phillips, thirty days' additional time was granted, within which to prepare, and serve and file a statement on motion for a new trial.

In the Fletcher case the examination of the defendant as to property was set for next Wednesday.

A judgment was ordered entered for plaintiff in the suit of Lucy Gilmore v. the American Fire Insurance Company, in accordance with filed stipulations. A demurrer was argued and submitted in the case of Kerchoff against Nordhoff. Thomas B. Hulise pleaded guilty of the charge of murder, and his trial was set for Wednesday, April 5th, at 10 A. M.

In regard to the demurrer of the defendant in the suit of Gibbs against McDonald and others, witnesses were examined, and two days allowed to file petitions and two days to answer.

Francisco Ballester, Louis Lowenthal and Juan Vega were each sentenced to eighteen months imprisonment at San Quentin.

In the suit of Thomas H. Smith against Lu Wheat Smith, the defendant was allowed till Saturday, April 15, to prepare a draft of the statement and affidavits for a new trial.

Isidore Verlandes and A. Mendina pleaded guilty, and their trial was set for Monday, April 3, at 10 A. M.

INDIAN PICTURES.

Some of the Desert Celebrities Photographed.

C. N. Wilson, an attorney of this city, has gathered up a few interesting pictures of our local Indians. One is of Cabazon, or Big Head, chief of the Desert Indians, who is known to be over a hundred years old, and yet lives. His carle de visite causes one to think of an Egyptian mummy. Old Cabazon's men built the Southern Pacific railroad out on the desert where it was so hot that neither white men nor Mexicans could work. The Indians were paid a dollar a day and their board, and did their work well. Another picture is of Manuel Largo, the chief of the Cahuillas, with his eight captives. Largo is a "heap big Indian." Two others are of Olagado and Pedro Pablo, chiefs of the Paines. P. Pablo, (Peter Paul), presents a fine appearance in his photograph, being nicely dressed. He cannot very well rob Peter to pay Paul, unless he does as the Scriptures say, not let his left hand know what his right does. Mr. Wilson obtained these photographs of the Indians at the times of their visits here. They are valuable relics.

Some Fine Fowls.

Mr. William Niles shipped yesterday to Fresno county four coops of fowls which for beauty could not be surpassed. The shipment consisted of half a dozen white Leghorns, half a dozen brown Leghorns, a pair of peacocks and a pair of splendid bronze turkeys. Mr. Niles says his business has doubled each year since he began business here, and this year his sales will be triple those of last year.

Inaccurate.

The map of California, in the Thompson & West atlas of Santa Clara county, for 1876, places Old Town and San Diego on False Bay, makes the peninsula several miles wide, and puts National City at the farther end of the ranch. A copy of this curiosity may be seen at Pomeroy & Brerly's real estate office.

THE ARCADE!

LOS ANGELES DAILY TIMES.

ABOUT TOWN.

Times are good in Los Angeles. All yesterday was beautiful, sunny and warm. Ethelism is the old Dolly Varden craze renewed.

The Antinori Concert is announced for to-morrow night.

The San Diego steamer has ceased carrying United States mail.

Deputy Sheriff Huber goes this evening to San Quentin with three criminals. Miss Lillie Bullis and John Nickerson were married last night at Compton.

C. F. Niece is putting in a handsome bay window in the front of his drug store. Merrill Lodge No. 299 meets this evening at the hall, over Dotter & Bradley's store.

There is to be a marriage in town to-night. The Times will make it known to-morrow.

A few more warm days like yesterday will cause the grass to grow so fast you can hear it crackle.

The sycamore trees are almost the first to bud. Everywhere in this vicinity they are quite well leaved out.

The telephone system of this city will shortly be extended so as to include every town in Southern California.

The "inclemency of the weather" paragraph will now take a rest—till the next "inclemency of the weather."

Tomatoes are said to be dead dogs and red pepper has in corn husks. They are very toothsome for all that, though.

Yesterday afternoon a little urchin named Freddy Downey met with a severe fall on the sidewalk in front of the Cosmopolitan.

The Ivy and University nines will play to-day at Agricultural Park, this being the first of three games for a ten dollar bat.

The funeral of Harvey Rhodes will take place to-day at 2 p. m. from his late residence on College street, near the French Hospital.

A large number of people were in town yesterday from the country, having taken advantage of the sunny weather to come in to trade.

A sheep owner of this vicinity who sold two thousand sheep at \$3.25 per head, three weeks ago, will not sell any more at less than \$4 each.

A street vendor, on the sidewalk in front of the United States Hotel, yesterday kept a crowd about him peddling his wares, the greater part of the day.

Fred. Holbrook has commenced suit against E. J. Baldwin, in Justice Adams' Court, for the payment of money due for pipe laid on Baldwin's place.

E. A. Edwards, of the Continental Oil and Transportation Company, shipped a car load of kerosene oil each to Benson and Tucson, Arizona, two days ago.

A large frame building has just been completed in the rear of A. L. Bath's establishment on Spring street, which is to be used as a manufacturing installation.

It is reported that the new Hellman-Childs block near the Cosmopolitan Hotel will be occupied as a mammoth furniture and carpet house by Dotter & Bradley.

Jacob Cahen, of the firm of Cahen Bros., San Francisco, has been here two or three weeks purchasing hides, pelts, etc. During his stay he purchased over \$18,000 worth of sheep pelts.

The Good Templars have again postponed their entertainment, which had been announced for to-night. Next Saturday evening is now fixed upon as the time it will surely be given.

It is rumored that E. J. Baldwin, of Santa Anita, is making arrangements to build two fine brick buildings on Spring street, opposite the court house, one on each side of W. C. Furry's hardware store.

S. Altamirano was fined five dollars yesterday by Judge Fisher for contempt of Court. Altamirano had arrested a man, and failed to bring him before any magistrate, and let him escape, hence, the punishment.

Mr. Barker, of the late firm of Barker & Mueller, will re-engage in the furniture business as soon as he can procure a suitable location. Several car loads of furniture for his new store are already on the way from Chicago.

The steamer Senator sails to-night for San Diego. Passengers will take the 4:15 p. m. train. She will leave Wilmington for San Francisco Monday. The Senator takes the place of the Ancon, which is laid up for repairs.

Rev. G. S. Abbott, of Oakland, Cal., will preach at the Baptist church next Sabbath morning. In the evening he will repeat a lecture on John Calvin, recently delivered at a meeting of the Baptist ministers of Oakland and San Francisco.

The mud of Spring street does not remind one of the lily and the sunflower. It might do for the authorities to have it removed and fill in with a coarse gravel, as has been done in other places, or have the streets macadamized, or paved.

An autopsy of the body of Mr. Henry Hoover, one of the projectors of the Muscatine Colony, who died immediately after his return to his home in Muscatine, Iowa, revealed the fact that it was cancer of the stomach that caused death.

Mrs. Givens, a wealthy young lady whose husband recently died, has acquiesced herself of a very generous act in fitting up and handsomely furnishing a room in the University of Southern California to be used as a sitting room or parlor for the young ladies.

As grass grows and feed becomes plenty, the price of beef goes up, and the steaks at the restaurants grow less in size. Several restaurants talk strongly of raising the price of board. There cannot be much profit just now in the eating line.

Tax Collector Cullen again offered the Southern Pacific Railroad for sale for the sum of its delinquent taxes, yesterday, but no one wanted a railroad. It has now passed into the hands of the State Comptroller, who will bring suit against the company.

LOS ANGELES.

First Impressions of a Stranger on Visiting the City.

A Live Town—Strange Sights—The Chinese Quarters—Cosmopolitan—The Schools—The Markets.

(Correspondence of the Chronicle, Walton, N. Y.)

As we came to this city with the intention of locating in its vicinity, it was with special interest that we looked about us to note the character of the town as to its size, its people, its schools, its markets, and its probable future. It is the largest town in Southern California, and contains from twelve to fifteen thousand inhabitants, there being only four larger cities in the State, namely: San Francisco, Oakland, Sacramento and San Jose. We have no sooner left the cars than we are struck with the bustle and activity about us, and make up our mind that we are in a "live town." As we ride from the depot to the business part of the town, evidences of enterprise greet our eyes on every side. Great flouring mills, immense warehouses, and lumber yards show that business is flourishing. Arriving on Main street we find fine hotels.

LARGE BUSINESS BLOCKS. Newspaper offices, and the bustle and activity of most towns of much larger size. We are not yet over our surprise at the amount of business transacted here. At nearly all times of the day shop-keepers are hurried, and the streets are full. For a month or two past business has not been quite so active, because of the fears that we were to experience a dry winter, but in November, a prominent hardware merchant told us his only trouble was to get goods as fast as he could sell them. In the many cities that we have visited from New York here, we have seen none of the size of this city.

SO CROWDED

And did the business Los Angeles apparently do.

In a walk about town, one sees strangely different sights. In one part is the old Spanish town with its queer, one story, thick-walled, adobe houses, some of which have stood over one hundred years. Here, the true Mexican is seen with his broad brimmed hat and his pants with rows of silver buttons down the side and a cloak over his shoulders. Here are dark haired senoritas with orange trees and palms looking out from under bright colored awnings. It is simply a portion of the old Aztec empire left in the center of a progressive town of our great republic.

CHIP FROM CHINA. Of the place, and one sees more sick people here than in any other city in the United States. Many need not remain sick long if they go about health-getting in the right way. Every few days we meet some one from some place in the East where they have lived, and several are here from our old home among the hills of Delaware county. One need not long remain lonely here.

The schools are among the finest, both in the city and throughout the State. During an experience of ten years in teaching near New York, we have never met a finer body of teachers than convened in Los Angeles last December as teachers' institute. We have visited schools in several States and in many cities, and have visited some very interesting institutes, but have never seen this.

ENTHUSIASM. Among teachers manifested here. As the teachers are from many Normal schools in all parts of the United States, there was a great exchange of ideas and methods, and the time was too short to discuss each new topic. The County Superintendent and his teachers are genial, cultured, enthusiastic, educational workers, and we feel honored to be a member of such a body. Los Angeles city has a first-class system of public schools with a high school having a classical department. There is also St. Vincent's, a Catholic college, and the University of Southern California, while a fine structure to be the

STATE NORMAL SCHOOL. For this part of the State is building one of the many low hills overlooking the city.

There are eight or nine churches and a Jewish Synagogue. Several daily papers are published, and facilities for the world's news are as good as in any Eastern town. The markets far surpass those of most towns in the interior. By the Southern Pacific, there are Arizona and New Mexico with their daily increasing mining population and the Mississippi valley for markets. By the Pacific Ocean, a few miles away, there are Asia and the Islands of the East. And when the Atlantic and Pacific Railroad is completed to this county the Atlantic seaboard. The home markets are good and living is

CHEAPER THAN IN NEW YORK. The best of flour is from \$6 to \$7 per barrel, and the finest cuts of meat are but fifteen cents per pound, although things brought from the East are higher than there because of the freight.

In another article we shall have something to say in regard to the climate and advantages of this county as a place for new comers. We will close this by saying that during a residence of six months here everything seems from close observation, to point to Los Angeles as a large city in the near future. Its lovely climate, its nearness to a sea port, its railroad facilities, and the wonderful agricultural possibilities of the surrounding country must give it a glorious future, and we believe, a few years hence, it will be one of the wealthiest and most cultured cities in the United States, as it is now one of the most delightful cities on the globe.

ROBERT L. PIERCE.

SHERMAN MADRE, Cal.

EASTERN STAR SOCIAL.

A Very Pleasant Affair—The Solid Quadrille.

The ladies of Aecis Chapter gave another of their pleasant socials last evening at Masonic Hall, and when the ladies of this Chapter do give a social it is in dead earnest. A programme of four numbers was rendered as follows: Instrumental solo, Miss Peabody; recitation, Mr. Tom Barnes; recitation, Mr. Esquerre; instrumental solo, Miss Mamie Woodworth. Dancing was then in order, and was kept up until the coffee got the best of the cooks, and then all repaired to the refreshment room and did ample justice to a splendid lunch. Dancing was then kept up until an early hour this morning. A new feature in dancing was the "solid quadrille," which attracted attention from all parts of the hall. Chas. E. Day didn't dance in that set. Oh, no. May the ladies remember us at their next social.

A Give Away.

A reporter of the Times having occasion to interview a native Californian, the following dialogue took place:

Reporter—Do you speak English?

Native—No, senyor.

Rep.—Que es el nombre de este loma?

Native—La Calle (pronouncing it is k-yah).

Rep.—No senyor, lo es la calle (pronouncing it is k-yah, as in the books).

Native—Oh, but it is all the same, it is a different English.

Rep.—But I thought you couldn't speak English!

The native suddenly had business that required attention.

Gold Hunters.

To show how much greater the magnetic attraction of gold is than iron, it has only to be said that yesterday upwards of fifty people were drawn to the place that the Times had indicated as having gold, and some even went so far as to take along a pick and shovel. Some good prospectors have been found, not only for building purposes but also as a substitute for that expensive article—Roman cement—in the manufacture of irrigating pipes. Los Angeles county may well be congratulated on the diversity of its products.

From Out the Ashes.

Harper, Reynolds & Co. have purchased 58 feet front by 145 feet deep on Los Angeles street, near the U. S. Hotel, from Jose Mascarell. They have made arrangements with Mr. Rivera whereby they secure a store 40 feet front by 130 feet deep in his block on Main street, parallel with their own property, making a total depth from Main to Los Angeles street of 275 ft. They will build a brick building on the property at once.

A Good Speculation.

About a year ago Mr. A. R. Loomis purchased the Spring street planing mill property for \$6,000. Yesterday he sold the same property to Mr. E. F. Spence, of the first National Bank, for \$11,000. Such instances as this show the prosperity of the city more plainly than words can express. Mr. Spence is a very careful financier, and it indicates the real intrinsic worth of the property when investments are made by such men.

From Westminister.

J. F. Sherwood, of Westminster, was in town yesterday, and reported that the farmers are jubilant over the prospects. Excellent crops being now assured. The rainfall last Sunday till Thursday aggregated 3.50 inches. Sowing is still going on extensively. Robert Eccles is constantly bringing in the packing house and is well pleased with the outlook. Forty-three cases of eggs were shipped to Los Angeles last week by three parties.

The Markets.

The grain market continues fluctuating, the stability of prices depending considerably on the future development of crops. Hay is taking a decided downward tendency, having been offered freely by dealers yesterday from \$13.00 to \$16.00 per ton. Oranges, lemons, and limes are advancing steadily. Potatoes, notably San Francisco imports, are advancing also.

A New Cottage.

Mrs. M. L. Ferguson is going to build a new six room cottage on the lot cornering on Seventh and Flower streets. Mrs. Ferguson built a five room cottage recently, which she has just sold, on Spring street, between Eighth and Ninth streets.

Weather Report.

Observations taken by the U. S. Army Signal Service at 8:15 o'clock last night are as follows: Barometer, 30.12; Thermometer, 49; wind, light 40; wind N.W.; 10 p. m. per hour; clear. Maximum thermometer, 60; Minimum, 44.

L. H. Washburn, of Muscatine, Iowa, will leave for home on Wednesday morning, stopping over at Riverside during the Citrus Fair. The arrangements for establishment of an extensive and well organized colonization company are well perfected, the particulars of which will be published in a few days.

The Gemma Tiozzo opera concert will be rendered at Turnverein Hall on Monday night. With every indication of settled weather for the next few days, the probability is that the attendance will be very large. All that possibly can should be attended.

The reference made to the offer received by Dr. J. P. and R. M. Widney for their recently purchased lot on First street, should have read: "They have already been offered \$3,000 more than the amount paid for the property." They paid \$7,000 and were offered \$10,000.

An emigrant team left town yesterday afternoon, bound for somewhere. It was well rigged out, and drawn by four good horses. Its owners believe in taking comfort while on the road.

The total rainfall for the season, according to Dr. Ducommun's rain gauge, has been 9.15 inches.

Miss Rosa Cameron, a school teacher in Westminster, was the recipient of the last twenty-fifth pair of gloves at Fox & Koster's.

ROBERT L. PIERCE.

SHERMAN MADRE, Cal.

PERSONAL MENTION.

W. H. Perry is back from San Francisco. P. Clark, of San Juan Capistrano, is in town.

E. J. Coleman returned to San Francisco last evening.

J. Ranch, of San Diego, is at the United States Hotel.

H. S. Lamaster, of San Diego, is at the Cosmopolitan.

J. E. Dupuy, an orchardist of Orange, was in town yesterday.

J. L. Garney, the brick maker of Santa Ana, was in town yesterday.

S. Lederer, a merchant of New York is a guest at the Pico House.

L. L. Bradley, a prominent merchant of Oakland, is at the Pico House.

W. B. Stone, a merchant of San Francisco, is a guest of the Pico House.

A. W. Simpson, a prominent lumber dealer of Chicago, is stopping at the Pico House.

Wm. Hodges, agent at Tucson for Wells, Fargo & Co., is in the city, a guest of the Pico House.

T. Fitzgerald, of Los Angeles, was registered at the International Hotel, San Francisco, last Tuesday.

F. M. Pixley, minus his mule, went flying through town last night on one of Stanford's iron horses.

It transpires that J. J. Woodworth's measles were merely a severe cold. That's all right, Joe, we will take your word for it.

Mr. Frank Eastman, who is proprietor of one of the leading book printing houses in San Francisco, is on a pleasure visit to our city.

Alexander G. Abel, Grand Secretary of Masons of California, is in our city for a few days' recreation. He is serving his twenty-seventh year as Secretary of the Grand Lodge of Masons.

PLEASURING.

A Lake Superior Party enjoy Los Angeles Scenery.

A party consisting of Messrs. E. D. Leavitt, of Cambridge, Mass.; J. N. Wright, Charles Briggs and J. W. Wright, of Calumet, on Lake Superior, all accompanied by their wives, and the latter by their daughter, are visiting Los Angeles on a pleasure excursion. They are owners of the great copper mines of Calumet and Hecia, on Lake Superior, the richest, perhaps in the world, some of the metal being taken out perfectly pure, and the lowest average eighty per cent. pure metal. They have immense reduction works and crush nearly all the ore of this Lake Superior region. Their own mines contributing eleven hundred tons of ore daily. Mr. J. N. Wright is the superintendent of the company, and Mr. Leavitt is the consulting engineer, and the richest, perhaps in the world, some of the metal being taken out perfectly pure, and the lowest average eighty per cent. pure metal. They have immense reduction works and crush nearly all the ore of this Lake Superior region. Their own mines contributing eleven hundred tons of ore daily. Mr. J. N. Wright is the superintendent of the company, and Mr. Leavitt is the consulting engineer, and the richest, perhaps in the world, some of the metal being taken out perfectly pure, and the lowest average eighty per cent. pure metal. They have immense reduction works and crush nearly all the ore of this Lake Superior region. Their own mines contributing eleven hundred tons of ore daily. Mr. J. N. Wright is the superintendent of the company, and Mr. Leavitt is the consulting engineer, and the richest, perhaps in the world, some of the metal being taken out perfectly pure, and the lowest average eighty per cent. pure metal. They have immense reduction works and crush nearly all the ore of this Lake Superior region. Their own mines contributing eleven hundred tons of ore daily. Mr. J. N. Wright is the superintendent of the company, and Mr. Leavitt is the consulting engineer, and the richest, perhaps in the world, some of the metal being taken out perfectly pure, and the lowest average eighty per cent. pure metal.
